

daily rental

corporate rental system

The right package to fit your business demands

Working in partnership with the majority of major rental companies, Plan is a comprehensive provider of vehicle rental supply, management and systems for business users.

Whatever the size of your organisation, and whatever the requirement, our goal is to provide a perfect fit of cost-effective services and solutions. As a result of the high volume of transactions that we place with our partners, we are able to offer some of the best rates around. As relationships are established with each supplier, it also means that service levels are already in place and processes are already set up for the complete rental management process, from point of reservation through to managing information, reporting and invoicing.

Systems

Our rental management system is built around our online solution which supports multiple supplier propositions. This, easy to use, rental platform gives our customers 24 hour access to rental booking, amendments and management information. Completely supplier-independent the Plan rental system will only auto accept bookings with suppliers that are provided at your agreed rates, ensuring that the prices on your rate plan are the prices you pay on every single rental. Every historical transaction and authorisation is held on the system along with invoices for complete transparency and accuracy. Powerful reporting to assist your time consuming tasks such as P I I D reports and Motor Insurers Database; data can be exported in seconds. Management reporting lets you analyse your rental spend by via a range of options such as cost centres, reasons for hire and hire types, further helping you to control budgets. Employees can be given different levels of access to the system depending on customer defined authority levels. This provides larger organisations with the ability to manage hire requests in house, on one system, against their own set of internal criteria. As the Plan rental system is delivered over the web there is no need for proprietary software and it can be accessed from anywhere in the world with an internet connection.

Features and Benefits

- Competitive rates customised to your usage
- Service level agreement
- Multiple partners ensuring an unbeatable choice of locations and vehicles
- Prestige and sports vehicles
- Duty of Car risk prevention
- Mileage reimbursement alternative
- Secure on-line rental management
- Bespoke management reporting
